## EXPERIENCE

### **Bloomberg L.P.**

Jan. 2016 - Present

Software Engineer

- Integrates the Bloomberg Professional service with Microsoft office by web UI technology
- Delivers static/real time market data, analytics, historical data to clients
- Develops frontend style standard for code quality and maintenance purpose

### **Bronx Center for Science and Mathematics**

Feb.-May 2015

Volunteer Robotics Programmer, Arduino

- Led the system programming of the DFRobotShop Rover V2 – Arduino Compatible Tracked robot for school robotics club

## SKILLS

JavaScript Backbone.js React.js C++ Python Ruby Ruby on Rails CSS  
Redux jQuery HTML5 Git SQL PostgreSQL RSpec TDD MatLab R

## EDUCATION

### **University of California, Los Angeles**

2013-2014

Master of Science in Mechanical and Aerospace Engineering

- Relevant coursework: Linear Algebra and Matrix Analysis, Graphs and Network Flows, Network Coding Theory and Application, Linear Programming

### **National Taiwan University**

2009-2012

Bachelor of Science in Mechanical Engineering

- Honors & Awards: 2010 and 2011 Presidential Award for Distinguished Academic Performance

## PROJECTS

### **Mumblr (Rails, Backbone.js)**

[Live](#) [GitHub](#)

A blogging web app inspired by Tumblr

- Utilizes nested composite views to improve garbage collection
- DRYs code with concise views, partials and mixins
- Provides real time updates by using event listeners
- Maintains code quality with critical test spec

### **Rails-Lite (Ruby)**

[GitHub](#)

A server side framework inspired by the functionality of Ruby on Rails

- Leverages Ruby's extensive metaprogramming to create a interface enabling the communication between MVC focused on RESTful web development
